01

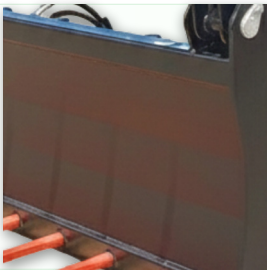

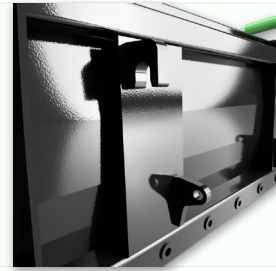

Heavy Steel Tube Construction

High Grade steel tube and plate construction for maximum rigidity when handling those big loads.

Integrated Hitch Pickups

Profile cut pickup plates from thick high tensile steel plate. Built tough to handle the heavy loads.

02

03

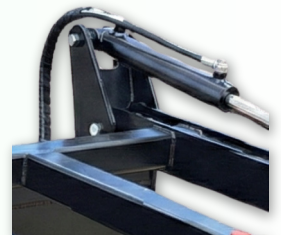

Enclosed Back Panel for larger loads

Fully welded steel plate to rear of grab to ensure that you get the largest load in one pass. No more wasted silage and hay.

Protected Hydraulic Hosing

All hosing routed to the rear of the grab for complete protection and reliability. No more broken or burst hoses.

04

05

Large Jaw Opening

With a massive jaw opening of 1.5m, you can easily pick up a large load of pit silage or even a full silage bale.

SHW Conus Spring Steel Tines

Highest quality SHW spring steel tines. Made in Germany. Giving you a lifetime of confidence.

06

100% Australian Made and Fabricated

100% Manufactured by Sturgeon Equipment in our Hamilton Facility to the highest quality standards. Only Aussie Made!

07
