

Standard 4 in 1 Bucket | Skid Steer | 50-100HP

The Sturgeon Standard 4 in 1 Bucket for Skid Steers is your go to for a versatile bucket that will never let you down. With the ability to load loose material, grade, grab and dig — all with a single attachment. 20mm thick, high grade steel floor and hydraulic locking valve as standard inclusions. Built to suit a large range of medium to large Skid Steer and Track Loader machines and most common pickup hitches available. Engineered and built to take the hard knocks of everyday use and supported by a 4-Year Warranty and caring team.

Talk to Us 03 5519 9732

28-30 Peck Street, Hamilton VIC 3300

02

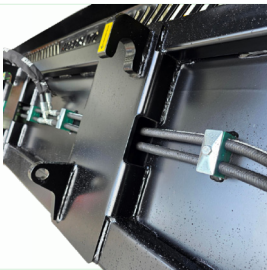

Extra Thick Pitman Arm Construction

Beefed up pivot arm plate thickness. Designed to take the hard forces of grabbing and grading.

Heavy Duty Side Plates

No corners cut here. Extra thick plates welded into side plates for wear protection. High grade plate for long service life.

03

04

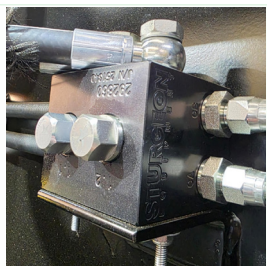

Protected Hydraulic Hosing

Hoses routed behind hitches. No wasted time with cut or burst hoses.

Large Jaw Opening

Optimised pivot points to ensure maximum dimension of jaw opening so you can grab those large loads.

05

06

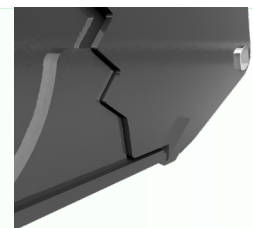

Locking Valve As Standard

Hydraulic locking valve included as standard on all skid steer 4 in 1 buckets. Enjoy maximum hydraulic grip power for the life of the attachment.

500 Brinell Oversize Cutting Edges

Oversized 20mm thick 500 Brinell cutting edges. Only the best is good enough. Bolt on edges and teeth available as an option.

07

100% Australian Made and Fabricated

100% Manufactured by Sturgeon Equipment in our Hamilton Facility to the highest quality standards. Only Aussie Made!
