

MULTIGRAB LT ULTIMATE | Telehandler | 2.5-6T

The MULTIGRAB LT Ultimate combines the performance of a bucket and grab in a single tool. Perfect for raking up large limbs and trees, removing stumps and shrubs, sieving rocks and debris, and much more. Featuring high grade steel plate and ladder frame construction, the design is engineered to handle every load on your property. With the super tough XD450 Abrasion Resistant teeth and multiple hitch options — there is the MULTIGRAB available to suit your exact requirements. As always, 100% Australian Made and covered with a 4-Year Structural Warranty.

01 Wear Resistant 16mm XD450 Abrasion Resistant Teeth

For life-long performance in the harshest of conditions. The XD450 teeth stand up to everything you can put them through. From abrasive rock work, running through the ground all day and heavy timber work — they will keep their shape every single time.

02 Massive Jaw Opening

With the massive jaw opening of 1.4m and bottom tine length of 700mm, there won't be much that you can't handle.

03 HD Reinforced Greaseable Pivots

Never fear breaking a pivot or wearing a pin with the MULTIGRAB HD reinforced pivots. Fully fabricated construction ensures a life of reliability.

04 Proprietary HD Pin System

We do it different. No bolts coming loose. No heads shearing off or being worn down by abrasion. We knew this was a problem, so we developed our own pin system.

05 Oversize Full width hydraulic hose protection

A broken hose or a damaged loader pickup is wasted time and money. The job needs doing without these problems. Fabricated from heavy gauge steel plate, this protection will never fail an operator.

06 Heavy Duty Integrated Hitch

No off the shelf hitch pickups used here. We design and profile-cut our own. Perfectly integrated and reinforced - you can have confidence in your attachment.

07 Motion stops on claw

Whether it is up, or whether it is down. Heavy plate stops to protect the cylinders from excessive forces. We know operators.

08 Locally made hydraulic cylinders

Locally Made and supported Hydraulic Cylinders. Made tough for harsh operating conditions and easily serviceable with parts available from local suppliers.

09 100% Australian Made and Fabricated

100% Manufactured by Sturgeon Equipment in our Hamilton Facility to the highest quality standards. Only Aussie Made!
